### PAMOUS BRIDGES.

A Few of the More Notable Struct-uces in America.

Ou the 5th of March, 1855, the locomotive passed over the celebrated Niagra suspension bridge for the first time. It was looked on as a wonderful work, and cably effaced. thousands visited it from all parts of the civilized world. It is about 800 feet in length between the towers, and hangs suspended in mid air 258 feet above the water. Its four great cables are each 94 are 15 feet square at the base, and 66 in height. The cost of the entire struct- that the Sun and the World are conducted ure was \$500,000.

iron bridge of Philadelphia, completed in lender, of eighty years ago. The Rev. July, 1850, at a cost of \$500,000. It is 390 feet long, 42 feet wide, 40 feet his death, "The general character of the above the surface of the water and weighs 1,200 tons. Five years were required in its construction

The Starruces Viaduct, on the line of the most grand and imposing structures feet high, 30 feet wide, consisting of 18 piers that will probably stand while time endures. Its cost was \$320,000.

The suspension bridge across the Ohio river at Cincinnati is 2,252 feet, and the roadway is 100 feet above the water. Its towers are each 86x52 feet at the base, 230 feet in height and 1,057 feet apart. 1850, and was about eleven years in the course of construction, and cost about \$2,000,000.

The Victoria Tubular Bridge across the St. Lawrence, at Montreal, Canada, is a grand specimen of engineering skill. It consists of an enormous iron tube, 22 feet high, 16 feet wide and 9194 feet long. It is supported by twenty-four stone piers and two solid abutments. It was opened for travellers in 1860, and cost \$6,300,000. The bridge across the Ohio river at Louisville is 5,210 feet long and is supported by 21 stone piers. Its cost was \$2,016,819.

The celebrated St. Louis bridge was commenced in 1869 and completed in 1874. The main part is 1,520 feet in length, divided into three spans, resting on piers of stone. The piers were sunk to the bed-rock in the river, through the sand from 90 to 100 feet, by means of wrought-iron caissons and atmospheric pre sures. The immense spans are each formed of four huge cast steel ribbed arches. The bridge is two stories in height, the lower story being used by the railway and the upper by street-cars, carriages and footmen. Beyond the spans it passes over a viaduct approaching 200 feet in length, when the railway enters a tunnel 4,800 feet long, passing under a great part of the city. The entire cost of the bridge and tunnel was over \$10,000,000.

The famous East river bridge, recently completed, is 1,505 feet. The height of the towers above high water mark is 276 feet, and the height of the roadway in the center above the water is 135 feet. The four cables are 3,578 feet in length and 157 inches in diameter. The entire bridge, including the approaches on each side of the river, is 8,172 feet long. Its construction began in January, 1870, and its probable cost when completed will not be less than \$16,000,000, and it is not strong enough for railway travel.

"A pretty time of night to come home, John," said a young bride, pointing to the clock, which stood at 1:10 A. M., "and you but just married, too, Ugh." "Mary, my dear," said John, pompously and somewhat thickly in speech, "I am a Liberal; you are evidently a Conservative. Let us neither now nor henceforth discuss politics; it will make home unhappy,"—[London Society.

RUGH HASTINGS ON POLIFICAL

[New York Comme cial Advertiser.]

If the editors of the Herald and the World and other journalists who are forever misleading their readers in regard to the morals and politics of the founders of the Government will only read this work, they will learn that the public men of our time are more honest and victuous and better citizens than the public men of years ago. Dr. Dorchester tells us that about the commencement of the present century in many of the New England towns desceration of the Sabbaths it wilness, neglect of the sanctuary, profanity and low cavils at the Bible were common, and the last vestiges of Puritan morals ucemed well-nigh irrevo-

This deplorable state of things, as we learn, extended into civil and literary circles. The newspaper partook of the general demoralization. Jefferson tells us, "Nothing can now be believed which inches in diameter and composed of \$,000 is seen in a newspaper. Truth itself bewires. The towers over which they pass | comes suspicious by being put into that polluted vehicle." There is no doubt with more dignity, decency and propriety The first east-iron bridge of any note than were the Democratic organs edited in the United States was the celebrated by Dunne, Cheetham, Freneau and Cal-Cheodore Parker said, not long before press since the end of the last century has decidedly improved, as any one may convince himself of by comparing the newspapers of that period with those of the Eric railway, near Lanesboro, Sus- the present." No President of late years, quehanna county, Pennsylvania, is one of | not even Tyler, Filmore, or Andrew Johnson was assailed with such bitterness and of the kind in America. It is a splendid violence by the press as was Washington piece of masonry, 1,200 feet long, 110 during his administration, "in such exsgerated and indecent terms," said arches, with spans of 50 feet, and strong Washington himself, "as could scarcely be applied to Nero or a notorious pick pocket." Our politics were then of the nost exasperating character. Such was the violent and malignant feeling prevailing that Federalists would not take the risk of trying their cases before a Democratic Judge and Damocrats would The work was commenced September 1. do the same in regard to Federal Judges; our elections were carried on by bargain and sale. Parton, in his "Life of Aaron Burr," describes how elections were managed in the campaign of 1800. Merchants and business men were made to contribute to election funds, and the money was used more shamefully at elec-

New Eagland may not be uninteresting here:

When that sturdy old Iriah woman to whom the Sullivan family may well look back with pride, was crossing the At lantic on her way to the new country, vas asked, "Why do you come to Ameria" it leads to see one of her sons Governor of w Hampshire and another of Massaletts, though I am sorry to say the idd not so much honor to his family, was known as "Devil Jim." The goes that after John Sullivan rose Governor of New Hampshire he to give a grand dinner to a nom-distinguished guests. A member militage the would not be equal to the grand of the member of the militage and the property of the member of New Hampshire he to give a grand dinner to a nom-distinguished guests. A member militage here is member and the member of New Hampshire he to give a grand dinner to a nom-distinguished guests. A member militage here is member and the second of the member and the head of the property of the member and the first property of the property of the member and the first property in the first property in the first property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserbed to said the sound lines and the property mentioned and asserb the occasion, he concluded it would be best to arrange for her non-appearance at the dinner-table.

Approaching the matter as gently as possible, he soon succeeded in making the quick-witted old lady understand the drift of his diplomatic talk, and in convincing himself that he had miscalculated the pride of the mother of the Sullivans.

Rising in all the majesty of her Iri h wrath: "John Sullivan!" exclaimed the old lady, "I have hoed potatoes in the
